

CAPTAIN HENRY DE BEAUVOIR TUPPER AM (1895-97)

He was born on 7 April 1883 and joined the Royal Navy after leaving the College.

He served in WW1, rising to the rank of Commander and was in command of HMS Scourge during the Gallipoli Landing. The following is apparently a picture of HMS Scourge towing boats ashore during the landing at Anzac Cove, 25 April 1915. The infantry transferred to the boats when 200 yards from shore.

His full career was as follows :

- he was promoted to the rank of Lieutenant on 30 June 1905.
- he was appointed in command of HMS Vixon on 28 May 1910
- he was appointed in command of HMS Bittern on 30 June 1912
- he was appointed in command of HMS Seal on on 20 March 1913
- he was promoted to the rank of Lieutenant- Commander on 30 June 1913.
- he was appointed in command of HMS Maori on 3 December 1913
- he was appointed in command of HMS Scourge on 22 June 1914
- he was promoted to the rank of Commander on 30 June 1917
- he was appointed in command of HMS Comet on 15 May 1918
- he was appointed in command of HMS Lapwig on 19 August 1918
- he was appointed in command of HMS Vampire on 7 January 1922

While serving on HMS Comet during WW1, he was awarded (gazetted on 21 February 1919) the Albert Medal for gallantry in saving life at sea (later replaced by the George Cross). He was awarded it jointly with Able Seaman ET Spalding "On 4 August 1918, HMS Comet, under the command of Commander Tupper, was seriously damaged in collision. The ship was badly holed on the starboard side, the deck and all compartments eventually filled with water as far as the engine room bulkhead and the stern was at any time liable to fall off. On being informed that the hydraulic release depth charge was set to "fire", Commander Tupper sent away a man in a whaler to remove the primer. It was only possible to remove the primer from one of the charges,

leaving the other depth charge about fifteen feet under water, still at "fire". Commander Tupper then went away in a dingy himself and by repeated diving operations tried to render it safe. After a rest he returned to complete the operation, in which Able Seaman Spalding, who was a passenger on the ship at the time and was a good swimmer, volunteered to assist. Commander Tupper at first refused to allow Able Seaman Spalding to assist him, as the later had no knowledge of depth charges and Commander Tupper did not consider it safe for him to go down. Ultimately Commander Tupper and Able Seaman Spalding swam to the spot beneath which the depth charge was submerged and alternately gave a turn to the iron bar which Commander Tupper had placed in the handle, until the primer was eventually unscrewed and taken out of the depth charge, thus rendering it safe. This operation was of the most dangerous nature, as at any moment the stern of the ship might have dropped off before the depth charge was removed and would have carried down both the Officer and the man, who would have inevitably lost their lives. The explosion would also have destroyed the remaining portion of the ship, with loss of life to those of the crew who were on board"

He was placed on the Retired List on 1 January 1923 and promoted to the rank of Captain (retired) on 7 April 1928.

He died on 14 November 1952 in Surrey, England.

The College Chapel contains this framed tribute to his being awarded the Albert Medal.
